ADPList Top 100 UX Mentor

I believe the best design leadership is invisible — not because design is absent, but because it's so embedded in how a business thinks that it becomes indistinguishable from strategy. Over 13 years, I've built and led globally distributed design teams, shaped product strategy at C-suite level, and driven outcomes across millions of users in complex B2C ecosystems. At Just Eat Takeaway, I've grown from Senior Designer to Design Lead — scaling a discovery framework adopted by a 150+ person org, launching a £4M+ product, and designing AI-integrated experiences that measurably shift behaviour.

CORE COMPETENCIES

LEADERSHIP	PRODUCT DESIGN	AI & TOOLS
Team building & mentoring	Service design & CX at scale	AI-integrated experience design
Coaching over directing	Discovery & problem framing	Claude-powered rapid prototyping
Executive stakeholder management	JTBD & Outcome-Driven Innovation	Prompt-driven design-to-dev bridging
OKR setting & design org scaling	A/B testing & experimentation	Figma, Miro, Cursor
Cross-functional collaboration	Design systems & accessibility (WCAG)	Kano model & opportunity trees

EXPERIENCE

Product Design Lead — Loyalty & Retention | [Just Eat Takeaway](#)

Dec 2022 – Present

Managing a team of 4 mid-to-senior designers across Bristol, London, and Amsterdam. Owning design strategy for the Loyalty & Retention pillar, reporting into senior leadership and engaging regularly with C-suite.

Team Leadership & Design Org

- Empowered mid-to-senior designers to own high-stakes work with strategic guardrails — coaching over directing to sustain psychological safety alongside a high bar for craft.
- Designed and scaled a product discovery framework adopted across a 150+ person design organisation, establishing shared language, process rigour, and quality standards.
- Set OKRs for Ventures design teams; established two-week sprint cadence, aligning design workload with product and engineering.
- Created ways of working influenced directly by a team well-being survey — demonstrating that operational structure and people care are not in tension.
- Led the organisation-wide shift to treating AI as a creative partner: rebalancing the team's 80/20 — 80% deep problem framing, 20% AI-assisted production — raising both output quality and strategic depth.

AI Prototyping & Design-to-Development

- Use Claude (Anthropic) to rapidly prototype interactive design concepts and functional micro-experiences, closing the gap between design intent and engineering implementation.
- Apply prompt-driven development to generate working HTML/CSS/JS prototypes directly from design briefs — enabling faster stakeholder validation and reducing handoff ambiguity.
- Embedded AI prototyping into team rituals: concepts go from Figma to testable prototype in hours rather than sprint cycles, accelerating discovery and reducing wasted build.

Key Initiatives & Impact

- Amazon Prime x Just Eat Partnership (Germany, Austria, Spain) — Served as the primary design bridge between Just Eat's C-suite and Amazon's global leadership. Negotiated the trade-offs between Amazon's single-URL technical constraint and local brand relevance across three markets.
 - Outcome: ~2M memberships purchased; 60% reorder rate; free delivery unlocked for 2M+ new users.
- Free Delivery Bundle (90-day pass) — Led design for launch and subscription lifecycle optimisation across web, iOS, and Android.
 - Outcome: ~£4M in purchases; 15% boost in incremental order frequency; 53% renewal rate.
- Just Eat+ Loyalty Programme — Currently leading design vision for the paid loyalty initiative targeting high-value customer acquisition and retention. Using Opportunity Solution Tree to map customer behaviour to strategic bets.
 - A/B testing: proved credit-based rewards 2.5x more effective than free delivery (3.8% vs 1.5% redemption).

- Stamp Card UX improvements: 34,860 incremental orders; 3.7% uplift in conversion-to-order.
- Basket-stage awareness campaign: 9,000 new sign-ups; 8% lift in programme conversion.

Senior UX Designer — Customer Pillar | [Just Eat Takeaway](#)Sep 2018 – Dec 2022

Led design on strategic customer-facing initiatives including dine-in, dish search, and a full checkout redesign. Stepped into informal mentorship across the wider design organisation.

- Led end-to-end UX for checkout redesign — one of the highest-traffic flows in the product — across web, iOS, and Android.
- Applied JTBD & Outcome-Driven Innovation (ODI) framework to map the complete takeaway food acquisition journey, uncovering functional, emotional, and social needs across every stage.
- Acted as UX mentor to designers across the organisation, a responsibility that directly informed my later leadership approach.

Senior UX Designer — Product Design Team | [Just Eat Takeaway](#)Jul 2015 – Sep 2018

- Led Jobs-to-be-Done research into underserved lunchtime ordering behaviours, informing new market opportunities.
- Designed restaurant collection points, marketing comms, and value proposition video.
- Validated product improvements through lean A/B experimentation in health and wellness.

PREVIOUS EXPERIENCE

Senior Visual Designer | [Somo](#)2014 – 2015

- Led UX and visual design for Audi e-tron explorer iOS app.

Senior Visual Designer | [Dare](#)2013 – 2014

- Designed Barclays Life Skills website and Dewar's Live True digital campaign.

Web Designer | [Imaginet](#)2012 – 2013

- Designed bespoke e-commerce solutions and managed client relationships.

EDUCATION & CERTIFICATIONS

Bachelor's Degree, Graphic Design

University of Newport, Wales | 2003–2005

ADPList Top 100 UX Mentor 2025

Nielsen Norman Group — Being a UX Leader (ID-1052641)

Design Sprint Academy — Problem Framing Certification

Design Department Certified — Demystifying Vision

Leadership Development Certification (ID-70258392)

Crucial Conversations — Mastering Dialogue, Crucial Learning

People Manager Training — Communication & Coaching
